Abstract

The purpose of this workshop is to demonstrate to Armenian teachers how to use Armenian resources on the Internet to improve and actively engage the learning experience of our students toward Armenian subjects. Today, there exist a considerable amount of Armenian educational websites that serve as a motivating, vital and beneficial tool in the learning process of Armenian language, history, literature and culture for Armenian students in all grades. Using such computer technology makes both teaching and learning Armenian more effective and interactive. The use of computer technology in classrooms increases student interest and enhances the knowledge and skill level in Armenian subjects. Based on educational research, "technology integration education is shown to have a rapid, positive effect on student attitudes." During this workshop, teachers will have an opportunity to observe the most current and useful Armenian websites relating to grade level subjects. They will examine how to integrate those websites into SmartBoard or PowerPoint if they currently utilize such technologies in their classrooms.
